

The local radio stations traffic reports are not up to date like XM radio. I was driving home from work in Decatur tx and XM reported a accident on a moajor highway US 287 and they had accurate information. None of the local radio stations reported the accident because it was after 7:00PM. XM updates the whole DFW area just not the Dallas of Ft. Worth interstates. I used to list to a AM station that updated on the "8's" and most of the time the inforamtion was out of date.
